

Introduction

NCE is a well-qualified and highly experienced fabrication work-shop. We can fabricate to all of our customer's needs, be it a "bespoke project", or a "production run" operation, and particularly for those tricky one-offs prototypes, our expert team will do justice to your prototype design or project.

Mechanical & Fabrication Services

IP65 Outdoor Enclosure

Milled Copper Bars

Fabrication Capabilities

NCE offer a wide range of metal and fabricated assemblies in both ferrous and non-ferrous materials, ranging from one offs to large batches.

MIG & TIG Welding
Shearing
Milling
Assembly

Powder Coating
CNC Punching
CNC Forming
CAD/CAM

Various brackets

Control boxes

316 Stainless Steel Outdoor Enclosure

Delivering Quality for 30 Years

Design and Development

Research, development & design are 3 areas where NCE concentrate our creative efforts. Our design teams technical experience and skills are further enhanced by the use of state-of-the-art Radan CAD/CAM software. We can also import and export DXF and Autocad files.

CNC Punching & Forming

Using the latest Trumpf brake press technology, our machines have multi-axis back gauges to reduce both setup and handling.

The CNC Punching machines not only punches but can form threads, produce extrusions and form flanges, quickly, easily and economically in the machine setup.

Protective Coatings

NCE offer a full range of system finishes including anti-bacterial powder, architectural grade polyester powder, epoxy polyester powder, epoxy powder, polyurethane powder and zinc rich powder primer.
