

RAPID RESPONSE SWITCHGEAR SERVICES,

TROUBLESHOOTING COMBINED WITH EXPERT FLEXIBLE RESPONSE TO MAXIMISE YOUR EQUIPMENT UPTIME.

Fast and Efficient 24/7 Emergency Service and Repair **HOTLINE** can help.

CONTACT US 24/7 on +44 (0) 141 952 1166

GLOBAL FAST RESPONSE SUPPORT:

SITE SURVEYS & ONSITE TECHNICAL SUPPORT
TROUBLE SHOOTING & FAULT DIAGNOSIS
BESPOKE TESTING & CURRENT INJECTION
THERMAL IMAGING DIAGNOSTICS
REPAIR & REPLACE
ANNUAL/BESPOKE MAINTENANCE
CLASSROOM & HANDS ON TRAINING
SPARE PARTS & SUB ASSEMBLIES
ASSET OBSOLECENCE UPGRADING
INSTALLATION
POWER & HARMONICS ANALYSIS

With our fully qualified and industry experienced flexible support team NCE Switchgear Engineering are the first choice partners for all aspects of increasing the longevity of switchgear in an increasingly health and safety focused environment.

Service

NCE Service division, provide a comprehensive package to ensure the critical uptime for all types of switchgear.

With our fully qualified and industry experienced team NCE Service are the first choice partners for all aspects of increasing the longevity of switchgear in an increasingly health and safety focused environment.

NCE Service offer technical support and maintenance for all 3rd party switchgear, from obsolescence management studies, site surveys, bespoke upgrade solutions, extensions, to 3rd party legacy designs

With a dedicated engineering support team offering 24/7 telephone assistance in the protection of people and assets, and fully flexible on site approach able to offer 24/7 planned call out services.

NCE's offer fully type tested designs to the latest international standards, Inc, IEC, ANSI, CAS and Marine Classification Society Rules.

NCE Service division can apply all of these services at any stage of the switchgears lifecycle, with a full and comprehensive report including detailed analysis and conclusions for the most cost effective approach to maximising uptime, MTBF, safety and security with scheduled interruptions to supply.

Extensions

Retrofit solutions can be a cost effective and highly efficient process ensuring legacy switchgear is compliant with current legislation.

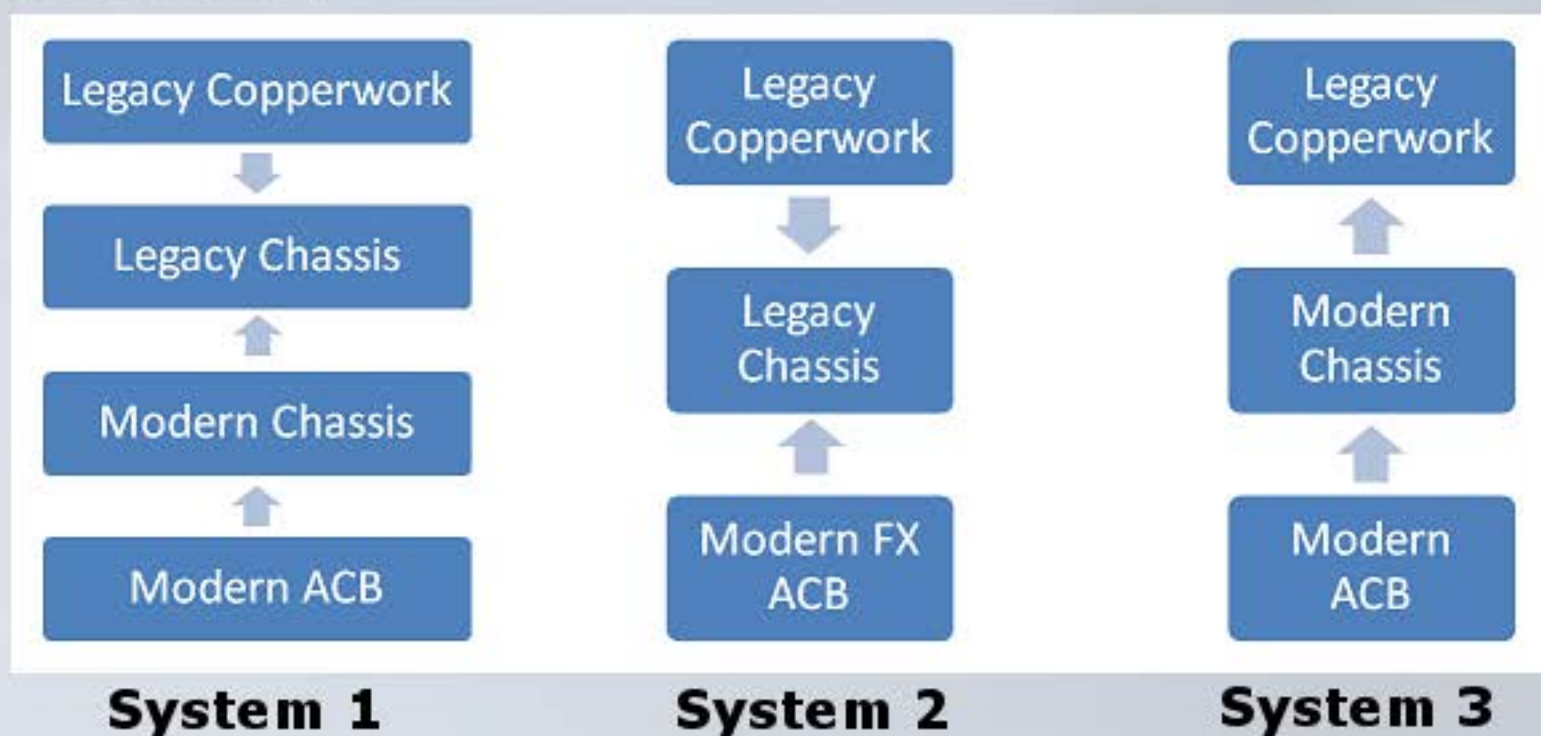

NCE Service division can offer a total solution, from detailed analysis to (ISO9001-2008) 3D design, full in house manufacture, assembly, and test, with a dedicated site team providing peace of mind installation and commissioning.

With extensive experience of retrofit conversions NCE Service division can provide full compatibility retrofitting current ACB's for legacy ACB's.

From simple relays, meters, MCCB's, to up rating busbars, NCE Service can provide a one stop shop.

Legacy ACB's can be retrofitted with any current manufacturer of ACB's, using NCE Service division's unique designs.

With 3 systems for retrofit solutions NCE Service will provide a tailored system for minimum downtime, and maximum efficiency.

Commissioning

NCE Switchgear Services offer a total solution, from detailed analysis to (ISO 9001-2008) 3D Prototype design, full in house manufacture, assembly and test with a dedicated site team providing peace of mind installation and commissioning.

From complicated protection schemes such as busbar blocking and intertrip logic to basic hard wired logic NCE can meet your retrofit and commissioning needs.

- Extensive electrical test/commissioning expertise of low/medium voltage switchgear.
- AC/DC drive system upgrades.
- Generator/Transformer systems.
- Protection upgrades for digital control schemes.

In order to guarantee the highest levels of efficiency and reliability of your circuit breakers we recommend regular servicing of you breakers & protection devices to identify potential faults, thus avoiding costly downtime.

Fully Qualified Test Engineers
